		Finished up front of Hall, fished as long as we could see. Had one bite just at dusk & struck was broken. Result nil. Jw. P. not a bite. 2 feeds anglers also did not have a bite.				
		Note: Think cause of fish not biting being lowness & clearness of water & want of rain. Only about 6 fish rose all days. Warm calm day. second growth of weed owing to the very mild open weather & fish are evidently feeding on insects in ponds.
